INSTRUCTIONS TO AUTHORS

PAGE CHARGES

Journal of Nuclear Research and Development has no page charges and no complimentary reprints.
The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail. The PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use.

CONTACT DETAILS FOR SUBMISSION

The manuscripts MUST be electronically submitted (via e-mail in both PDF and MsWORD formats) to:
jnrd.editors@gmail.com.
For other general correspondence, the address is:
JNRD Editorial Office
Institute for Nuclear Research
115400 Pitesti-Mioveni, str. Campului, nr.1, Romania

All correspondence, including notification of the Editor's decision and requests for revision, takes place by e-mail removing the need for a paper trail.
A single PDF and MsWORD file (not exceeding 10 Mb) of the manuscript must contain the submission page, the text, tables, and figures. All pages must be numbered in this order consecutively. Manuscripts composed by separate files WILL NOT BE ACCEPTED.
The submission page will include (in the following order): corresponding author's name/title/affiliation; full mailing address (including telephone and fax numbers, e-mail address); manuscript's type and title; number of pages for text/ figures/ tables/ photos.

MANUSCRIPT STRUCTURE

Submitted full papers must be correct, original, nontrivial, complete works and written in clear and concise English. If a poor language or undecipherable English is used, the manuscript will be rejected.
The text should be prepared by using MsWord2007 or previous versions, on A4 (210 x 297 mm) paper with margins of 25 mm all around.
Standard format includes adequately classified headings as: Abstract, Keywords, Introduction, Methods/Materials and Methods/etc, Results and Discussion, Conclusions, Acknowledgments (if necessary) and References. Section titles must be short but informative. Each heading should appear on its own separate line.

Essential title page information
Title of the article: Concise and informative; Avoid abbreviations and formulae where possible; 12 point "Times New Roman", all caps, bold, centered, single spaced; one blank line left after the title
Author(s) name(s): 12 point "Times New Roman", all caps, centered, single spaced; one blank line left after the author's name
Affiliation(s): Provide the full postal address of each affiliation, including country name; 12 point "Times New Roman", sentence case, italic, centered, single spaced
Corresponding author mailing address: Clearly indicate to whom all correspondence should be addressed; 12 point "Times New Roman", lowercase, italic, centered, single spaced; two blank lines left before Abstract.

Abstract
The *abstract* will not exceed 250 words and should state briefly the main objectives, methods, experimental techniques, findings and conclusions. References, non-standard or uncommon abbreviations should be avoided. The word *"Abstract"* should be 12 point "Times New Roman", italic, centered, single spaced. The abstract text start immediately after section title and should be 10 point "Times New Roman", sentence case, justified, typeset in block mode (no distinct paragraphs) and single spaced. Immediately after the abstract text, authors should provide no more than *5 keywords* to assist for cross-indexing purposes. The keywords will be 10 point "Times New Roman", italic, single spaced.

Manuscript text
Manuscript text should be 11 point "Times New Roman", single spaced, justified (each new paragraph being separated by a blank line from the previous one). Each section title/heading should be 12 point "Times New Roman", bold (no blank line after heading).
The full paper text should be as brief as possible and no more than 16 printed pages including tables and figures. With the approval of the Executive Editors, additional pages may be published. Authors should make every effort to follow the main objective of the paper and present concise and complete works, reducing as much as possible low relevant information, in order to render paper understandable to readers outside a narrow specialty. The English UK speller checking is strongly recommended.
Do not change the font sizes or line spacing to squeeze more text into a limited number of pages.

Tables and Figures
Type or print out each *table* on a separate sheet of A4 paper. Number tables consecutively in the order of their appearance in the text and supply a brief title for each. Place table titles above the tables. Give each column a short or abbreviated heading.
Place explanatory matter in footnotes to tables (not in the table headings) immediately below the table body and indicate them with superscript lowercase letters. The footnotes to tables must be 9 point "Times New Roman", italic, indented left 1.5 cm, justified.
Figures/illustrations include photographs, charts, diagrams and line drawings, and these should be camera-ready. Freehand or typewritten lettering IS UNACCEPTABLE.
Illustrations should be sharp, glossy black-and-white or color (sharp visibly in grayscale for printed version) photographic prints, with very good quality, no larger than A4. Print each chart/diagram on a separate sheet of A4 paper. Letters, numbers and symbols should be clear and large enough to retain legibility when reduced.

Number figures consecutively in the order of their appearance in the text and supply a caption for each. Place figure captions immediately below figures. Do not include captions as part of the figures. Do not put captions in "text boxes" linked to the figures. Do not put borders around the outside of figures. Designate all illustrations as figures by using the abbreviation "Fig." or "Figs."

Equations

Number equations (11 point "Times New Roman", single spaced) consecutively with equation numbers in parentheses flush with the right margin, as in (1).

To make your equations more compact, you may use the solidus (/), the exp function for power of e, or appropriate exponents. Use parentheses to avoid ambiguities in denominators. In principle, variables are to be presented in italics. Punctuate equations when they are part of a sentence, as in

$$\int_0^{r_2} F(r,\varphi)\, dr\, d\varphi = [\sigma r_2 / (2\mu_0)] \cdot \int_0^{\infty} \exp(-\lambda\,|\,z_j - z_i\,|)\,\lambda^{-1}\, J_1(\lambda r_2)\, J_0(\lambda r_i)\, d\lambda\,. \quad (1)$$

Be sure that the symbols in equation have been defined before the equation appears or immediately following.

Footnotes to text must be avoided.

References

References (11 point "Times New Roman", single spaced, justified) should be listed in a separate section at the end of the paper and should be cited in the text as [1], [2, 3], [5-8], etc. Number the references in the list in the order in which they appear in the text.

References should include, as follows: authors' names, year of publication in brackets, article or chapter title, journal or book title, editors (books only), name and address of publisher (books only), volume number, and the first and last page numbers. All author's names should be listed in the Reference. Do not use "et al.".

The pre-publication articles, available online prior to their inclusion in a printed issue, can be cited in the text and reference list, with their DOI (Digital Object Identifier) in place of volume number and page range.

Web site citations should not be included in the reference list. Complete URL (http://host.name/path/file.html) can be cited in the text, but limit to as few as possible.

Only the papers accepted for publication but not yet published may be cited as "in press" in the References. They must be accompanied by the journal name. One copy of the accepted manuscript cited as "in press" should accompany a hardcopy submission.

Short communications (less than 4 printed pages, including figures, tables and references) are also accepted by JNRD. With the approval of the Executive Editors, additional pages may be published.

Papers of this category, reporting timely novel findings, are brief accounts of original research results, should have a similar standard of quality and scientific merit as full papers, respecting the same instructions mentioned above.

REVIEWING PROCESS

A submitted paper will be refereed in the traditional way by at least two referees. Papers are accepted for publication based on favorable recommendations by the referees. However, referee reports are advisory to the editors. If necessary, the author(s) would be asked to revise the manuscript according to the referees report. The Editorial Board reserves the right to make reasonable modifications in wording.

The Journal policy is that Editorial Board will make every effort to arrive at a decision within reasonable time, but ***no more than 3 months after submission***.

COPYRIGHT

Together with the manuscript, the corresponding author will send a preliminary **agreement on copyright**, available on the Journal web site, www.jnrd-nuclear.ro, signed by all of the authors of the paper, in which the following aspects are settled: authors rights and responsibilities, designation of the corresponding author responsible to represent all the others in the relation with editors, and also the agreement of all paper's authors to delegate responsibility to the corresponding author regarding signing of final copyright-transfer forms, if the paper is accepted for publication.

Authors may not present data and other results obtained by others as if they were their own. Authors may not incorporate without attribution text from another work (by themselves or others). If a direct quotation is appropriate, quotation should be clearly indicated and the original source should be properly cited.

Authors should certify that has been obtained written permission for the use of text, tables, and/or illustrations from any copyrighted source(s), and should agree to supply such written permission(s) to the JNRD Editorial office upon request.

Papers that have been found to be in violation of these rules **will be rejected**.

If the JNRD Editors agree to consider a submitted manuscript for publication, the corresponding author will be requested to return the final **copyright-transfer form** signed as soon as possible to the JNRD Editorial Office. It is the responsibility of the authors, not of the JNRD, to obtain any security clearances and to determine whether disclosure of their material requires the prior consent of other parties and, if so, to obtain it also. Before a manuscript can be accepted for publication, the corresponding author is required to complete the form assigning to *Journal of Nuclear Research and Development* all rights under copyright that may exist related to the paper accepted for publication.
